

December 3rd, 2024

To Our Customers,

In response to your request for information regarding Proposition 65 (Prop 65), California's Safe Drinking Water & Toxic Enforcement Act of 1986: The chemicals on the list (*see link below*), are known to the state of California to cause cancer, birth defects or other reproductive harm. Many, but not all, of the chemicals have minimum levels that must be present before warnings are required.

Some chemicals require warnings at any level. Several of the products we distribute may contain chemicals that are present on the Prop 65 list. We however, are not individually labelling each product because they do not provide any of the avenues for exposure under normal intended usage. Simple handling of our product(s) is not generally a concern as long as the product(s) are not used in a way that creates exposure through inhalation, ingestion or absorption.

Updates to this letter will be posted to our website:
